

FA-00

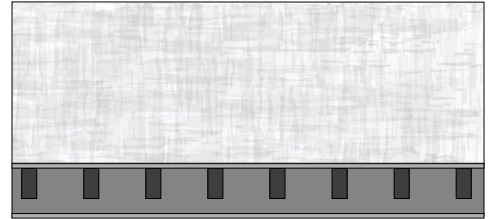

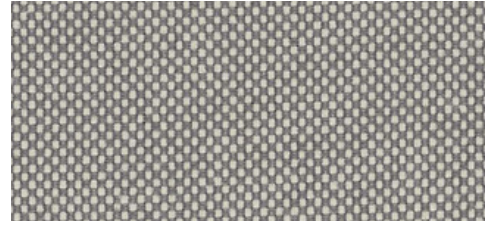

_Sound Reflective Surface

FA-00 is a panel consisting of three layers of fireproof MDF, that is micro pierced forming a total thickness of 16 mm. This ensures the improvement of the acoustic comfort, thanks to the ability to reflect the sound waves.

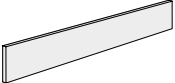

The visible part is coated with flame retardant fabric. The reverse is covered with black felt which dissipates the sound wave.

FA-00 has a thickness of 16mm and planks standard size of 192x3600mm, square of 600x600mm, and panels of 900x2000mm.

Custom measurements are available.

Supported formats:

 <p>Planks (DG) 192x3600mm Available in custom dimensions</p>	 <p>Square (SQ) 600x600mm Available in custom dimensions</p>	 <p>Panels (PA) 900x2000mm Available in custom dimensions</p>
